

Javascript:

1. Call, apply, bind in javascript
2. How to add a custom method in default Array class
3. Closures
4. If I have 5 API calls, and if I want to prioritize last api, in case of 2nd one being failed, how can we achieve this?
5. How observables work behind the scene, where the stream of data is stored.
6. How to make an object immutable

Angular:

1. How to pass parameters in angular pipes?
2. What are data passing strategies in Angular?
3. What are hooks in SPA frameworks?
4. What is the difference between prod build and local build?
5. Rxjs operators - map, of, from, mergeMap, concatMap, switchMap, exhaustMap
6. Difference between Subject vs Behaviour Subject
7. Directives in angular. Can we use multiple directives together?
8. Lazy loading in angular
9. Stand alone component in angular 10+
10. ngSwitch, trackBy
11. ViewChild, ViewContainerRef and TemplateRef
12. Difference between ng content and ng template
13. Difference between reactjs and angular
14. Signals in Angular, NgRx, state management in angular
15. Specificity in HTML
16. What is NgModule in angular
17. What is bootstrap in angular
18. HTTP Interceptors in angular

Node.js:

1. How microservices are managed in nodejs?
2. Preflight request
3. What is handshaking in real time communication
4. How to fetch 1 gb of data from server and store it again
5. Difference between authentication and authorization
6. Difference between Parallelism vs Concurrency
7. Event loop in nodejs
8. Difference between PUT, POST, GET, PATCH requests
9. Server-Side Rendering (SSR)
10. What is callback hell and how can we tackle this problem?
11. Event Emitter in nodejs

Mongo:

1. What is Indexing, Aggregation, Projection?
2. How to access multiple collections in mongo?
3. Sharding
4. \$var vs \$expression

SQL:

1. What will happen if we put groupby before sort and after sort?
2. How to prevent invalid access to data in raw SQL queries, how to validate raw SQL queries?
3. SQL Injection
4. Get 2nd highest salary, SUM(), GROUPBY()
5. How to JOIN two tables

Real time communication:

1. Pusher.io - how does it establish connection between server and frontend?
2. How does pusher works behind the scenes

Devops:

1. AWS Lambda
2. S3
3. Limitations of using AWS lambda
4. Caching strategies
5. Nginx
6. Jenkins
7. Docker
8. Kubernetes
9. Kafka
10. OAuth
11. How to secure a microservice

Data Structures:

1. Find index of a target using binary search
